BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problems Mailbox.**

1 [Conceptual analysis of lexical taxonomies: the case of WordNet top-level](#) 77%

 Aldo Gangemi , Nicola Guarino , Alessandro Oltramari
Proceedings of the international conference on Formal Ontology in Information Systems - Volume 2001 October 2001

In this paper we propose an analysis and an upgrade of WordNet's top-level synset taxonomy. We briefly review WordNet and identify its main semantic limitations. Some principles from a forthcoming *OntoClean* methodology are applied to the ontological analysis of WordNet. A revised top-level taxonomy is proposed, which is meant to be more conceptually rigorous, cognitively transparent, and efficiently exploitable in several applications.

2 [System-level power optimization: techniques and tools](#) 77%

 Luca Benini , Giovanni de Micheli
ACM Transactions on Design Automation of Electronic Systems (TODAES) April 2000
Volume 5 Issue 2

This tutorial surveys design methods for energy-efficient system-level design. We consider electronic systems consisting of a hardware platform and software layers. We consider the three major constituents of hardware that consume energy, namely computation, communication, and storage units, and we review methods of reducing their energy consumption. We also study models for analyzing the energy cost of software, and methods for energy-efficient software design and compilation. This survey ...

3 [Improved classification via connectivity information](#) 77%

 Andrei Z. Broder , Robert Krauthgamer , Michael Mitzenmacher
Proceedings of the eleventh annual ACM-SIAM symposium on Discrete algorithms
February 2000

4 [Desiderata for the standardization of LISP](#) 77%

7 Designated for the standardization of LISP

Christian Queinnec , Luc Steels , Herbert Stoyan
Proceedings of the 1986 ACM conference on LISP and functional programming August
1986

5 Proof verification and the hardness of approximation problems

77%

-  Sanjeev Arora , Carsten Lund , Rajeev Motwani , Madhu Sudan , Mario Szegedy
Journal of the ACM (JACM) May 1998
Volume 45 Issue 3

We show that every language in NP has a probabilistic verifier that checks membership proofs for it using logarithmic number of random bits and by examining a constant number of bits in the proof. If a string is in the language, then there exists a proof such that the verifier accepts with probability 1 (i.e., for every choice of its random string). For strings not in the language, the verifier rejects every provided "proof" with probability at least 1/2. Our res

...
